

**Furnaces**  
80% AFUE

**Integrity, Expertise & Reliability**

**The best gas furnace is the kind you don't have to think or worry about. It comes on the moment you need it and then runs quietly and efficiently all winter long as needed. All Patriot® gas furnaces are loaded with features designed to provide outstanding performance for years to come. We use advanced techniques and materials so you know the cozy, even heat you feel in every corner of your home is an energy-efficient warming trend that's designed to stay for many years.**

**High heating bills burn us up, too. Our complete line of gas furnaces are priced to help add comfort to your budget from A.M. Botte Mechanical. And that's only the beginning. We want you to smile every time you open your utility bill, so we design into our units proven energy efficient technology. (Features vary by model)**

**What is AFUE?** AFUE is the abbreviation for 'Annual Fuel Utilization Efficiency' ratio. AFUE is the percentage assigned to rate furnace efficiencies by dividing the ratio of heat output by heat input. This measurement describes how well fuel, natural gas or propane is consumed to produce heat by a furnace. As the AFUE percentage rate increases, the efficiency of your furnace also increases, which can help to lower your fuel costs.

## **WHY PATRIOT?**

**Multi-speed PSC blower** - The permanent split capacitor (PSC) electric motor provides airflow to match comfort needs, and reduces energy consumption and system noise compared to a single-speed motor.

**Tubular heat exchanger with wrinkle bend technology** - Constructed from tubular aluminized-steel, the primary heat exchanger is designed for outstanding durability and heat transfer. The use of wrinkle bend technology maintains the wall strength of the tubular design and aids in the efficient transfer of heat.

**Sloped heat exchanger design** - The sloped angle of the heat exchanger allows for optimal condensate drainage.

**Multi-speed ECM blower** - The top performance of an electronically commutated motor (ECM) provides airflow to match comfort needs, and reduces energy consumption and system noise compared to a single-speed motor.

**Variable-speed ECM blower** - The variable speed electronically commutated motor (ECM) precisely and efficiently controls the flow of heated or cooled air throughout your home without cycling on and off. Better airflow control means reduced temperature swings and a consistent balance of temperature and humidity.

## A LOT OF QUALITY GOES INTO EVERY PATRIOT BRAND GMVC80 GAS FURNACE

### The art of precision

**Heavy-Duty Aluminized-Steel Tubular Heat Exchanger** – Constructed from tubular aluminized-steel, the primary heat exchanger is designed for outstanding durability and heat transfer. The use of wrinkle bend technology maintains the wall strength of the tubular design and aids in the efficient transfer of heat.

**Two-Stage Gas Valve** – Reduces energy needed during moderate demand to deliver outstanding comfort and efficiency as compared to single-stage gas valves. Efficient and Quiet Variable Speed ECM Circulating Motor – Provides quiet system startup and shutdown with highly-efficient performance.

**ComfortBridge™ Technology** – Continuously monitors system performance for customized indoor comfort.

**Self-Diagnostic Control Board** – Silently and consistently monitors the gas furnace to ensure all furnace components are working properly and helps to achieve the energy-efficient performance too. Also, allows for quick troubleshooting when gas furnace needs maintenance.

**Corrosion-Resistant Vent Variable-Speed Blower** – Provides quiet system startup and shutdown with highly-efficient performance.

**Durable Silicon Nitride Igniter** – This advanced energy-efficient technology eliminates the need for a traditional pilot light. The igniter is constructed for both strength and outstanding reliability.

**Insulated Furnace Cabinet** – Even the metal walls of this gas furnace support energy efficiency. A fully insulated cabinet helps to keep the heat inside the furnace and has less than a 2% air leakage rate. The insulation also assists with noise suppression when the furnace is operating.

**Warranty** - The Patriot brand GMVC80 comes standard with a 10 year Goodcare labor warranty, 10 year limited parts warranty and lifetime limited heat exchanger warranty with 10 year limited unit replacement\*.

## INTEGRITY. EXPERTISE. RELIABILITY.

### COMPONENT UPGRADE OFFERS BETTER PERFORMANCE

The aluminized steel, tubular primary heat exchanger featured in Patriot brand gas furnaces is likely the most essential component in a gas furnace's performance. This distinctive heat exchanger employs wrinkle-bend technology which was developed to deliver extraordinary durability and long-term reliability.

ComfortBridge™  
technology

### STAY CONNECTED WITH COMFORTBRIDGE™

ComfortBridge off-the-wall communicating technology constantly monitors the performance of a high-efficiency heating and cooling system. As ComfortBridge technology gathers data, it uses it to make automatic adjustments, as needed; to use the minimum amount of energy required to create consistent and comfortable indoor heating and cooling. Rather than installing the communications technology circuit board in the thermostat (which is connected to an inside wall in a home), the ComfortBridge circuit board is securely installed in the indoor unit of the energy-efficient heating and cooling system. ComfortBridge technology works with any single-stage thermostat to help create customized indoor comfort specifically for you and your family.
